Watering Meters

What are watering meters?

A watering meter is an additional water meter that can be obtained through the city water department in addition to your normal household meter to measure water usage that is not treated through the waste water process. They are available for use from May 1st through October 1st.

What are they used for?

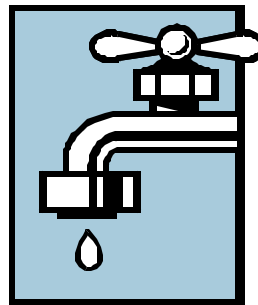

- Watering lawns
- Watering gardens
- Filling swimming pools
- Other special water needs

Why do I need one?

By having an additional water meter, you can keep track of the water consumed for these special needs. When the meter is returned, you may receive a credit for the sewer charges.

How do I get a watering meter?

Call the City Water Plant at (641) 236-2635. If no answer, call the City Offices at (641) 236-2604.

Is there a charge for having a watering meter?

There is a \$20.00 charge for the use of the meter, the cost of the water usage, and the sewer charges, which may later be credited to your account. If the meter should freeze, you will be responsible for the cost of replacing the meter.

How do I get the sewer credit?

Call the City Offices at (641) 236-2604 to arrange for the return of the meter. Once it has been turned in, the credit is calculated and applied to your next regular bill.

Questions?

Call (641) 236-2604.
